

Deliver your data to a physician *Anytime - Anywhere*

When “stat” Really Means “STAT”

Full Motion
Ultrasound

X-Rays

MRI's

CT Scans

Dye Contrast
CINE Loop

mVisum offers customizable integration solutions that allow delivery of high quality images and other data from your RIS/HIS System directly to a physicians smartphone. Once delivered, physicians can immediately review and respond to patient data using mVisum's proprietary technology. A “stat” read has a whole new meaning with our integrated solutions.

Review Station
